PROJECT WORKS

IFSC CODE FINDER

Description

IFSC Code Finder project that helps the user to find the IFSC code of any bank instantly. It has two modules i.e. user and admin. In the present system, Users have to visit the bank to ask IFSC code. This IFSC code finder project helps the user to find IFSC code online from anywhere. User can visit the website and search for the IFSC code by using bank name, branch name, and pin code /zip code. Admin will be the user of this project who can control the whole website. It will provide the location, address and also their contact number by entering the branch name. In this project admin can also update their own profile and also admin changes their own password.
